

Webinar Series

FREE AND OPEN-SOURCE SOFTWARE FOR WATER RESOURCES ENGINEERING

As part of the new eMasters in Water Resources Engineering (eMWRE), a series of webinars will be held to show the value and application of free and open-source software (FOSS) in the field of water resources engineering. Partners in Palestine, Jordan, Europe, and abroad will introduce 4 different FOSS programs and show examples of their application in the region. Each webinar will also include time to engage with the expert panel during a Q&A session.

The webinar series is free to attend and open to the public. Current and prospective students, researchers, and practitioners in the MENA region are encouraged to join. For more information and registration, go to <https://emwre.eu/webinar>. Attendees can also earn a certificate and a badge for every webinar attended.

eMWRE, an Erasmus+ Project, will implement an online Master program using innovative technology and advanced tools to provide more sustainable solutions to the water scarcity problems in the MENA region. More information on the program can be found at <https://emwre.eu/>.

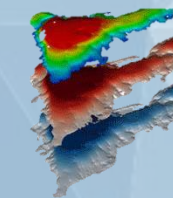

November 3, 2020
19:00 EET/18:00 CET
Hosted by Al-Quds University and IHE Delft

November 10, 2020
19:00 EET/18:00 CET
Hosted by Mutah University and IHE Delft

November 17, 2020
19:00 EET/18:00 CET
Hosted by the University of Jordan and Vrije Universiteit Brussel
