MSc in Water and Sustainable Development

Water and Health

MODULE 2
Introduction to Water and Health

MODULE 3 OPTIONS
Surface water treatment
Drainage and sewerage
Rethinking water
City-wide inclusive sanitation

MODULE 4 OPTIONS
Groundwater treatment
Wastewater treatment processes and technologies
On-site sanitation and treatment
Organizing water

MODULE 5 OPTIONS
Water transport and distribution
Sludge treatment and resource recovery
Institutional analysis of water use practices
Finance and implementation

MODULE 6 OPTIONS
Drinking water treatment plant design
Wastewater treatment design
Policy analysis
Humanitarian WASH

MODULE 7 OPTIONS
Desalination and water reuse
Operational management of water systems
Industrial water and resource management
Experimental methods for water, sanitation and environmental technology
Change and advocacy
